Cloudflare Inc. is a company that provides cloud infrastructure services, including a Content Delivery Network (CDN), website security, and data center services. The company was founded in 2000 and is based in San Francisco, California. It has since expanded to become one of the largest CDNs in the world, serving over 10 million websites and 1 billion unique visitors per month. Cloudflare's services include SSL/TLS encryption, DDoS protection, and web application firewalls. The company also offers a range of products for businesses, such as a managed DNS service, a serverless computing platform, and a data center network. Cloudflare's mission is to make the Internet faster, more secure, and more reliable for everyone.
